

DV-404

Reinforcement Profile Screwing Machine

- For single profile processing.
- Automatic screwing of the reinforcement profile by means of foot pedal switch.
- Adjustable according to different profile cross sections.
- Automatic screw feed.
- Automatic depth stop system independent from profile height.
- Standard equipped with profile support conveyors left and right.
- Pneumatic clamping during processing.

Technical Features

- Air Pressure: 6-8 bar
- Air Consumption: 200 l/min.
- Max. Profile Dimensions: 110 mm x 80 mm
- Min. Profile Width: 40 mm
- Machine Height: 2150 mm
- Machine Length: 400 mm + 3910 mm (Included Conveyors)
- Machine Width: 750 mm
- Machine Weight: 105 kg
